

LONG YEARS AGO

August 21, 1903

Dr. Brodie reports that his new drug store will be in operation in about two weeks.

Duck shooting commences Monday, August 24th and local sharpshooters are oiling up their guns.

The Didsbury Agriculture Society fall fair prize list is now being distributed.

Mr. Norman Stecke is in town with his latest patent hay lifter and support.

FUNERAL FOR WM. LOWRIE

Funeral services were held in Jacques' Chapel, Calgary, Monday, August 15th at 1:30 p.m. for William Lowrie, 81, former resident of the Didsbury district, who died in Vancouver August 9th. Rev. J. Rex Brown officiated and burial was in the Union cemetery.

Born in Edinburgh, Scotland, Mr. Lowrie came west to Calgary in 1906, operating a tailor shop for a time. He farmed in the Didsbury district prior to moving to Vancouver five years ago.

Surviving are three daughters, Mrs. J. Handley, Federal, Alberta; Mrs. H. S. Lank, Cowley, Alberta; Mrs. W. Dodds, Vancouver, and one son, Ernest, with the Canadian Army.

VETERINARY NEEDS

DIDSBURY, ALBERTA, THURSDAY, AUGUST 23, 1945

MEMORIAL AND THANKSGIVING SERVICE AT BUTTE

Sponsored by Didsbury Branch of Can. Legion

Sponsored by Didsbury Branch No. 106, Canadian Legion of the British Empire Service League, a memorial and thanksgiving service was held at the Butte on Sunday, August 19th, commencing at 3:00 p.m.

Led by the Carstairs-Didsbury band, members of the Legion and the Didsbury and Carstairs detachments of the 14th Army Tank Corps (Reserve) marched from the Legion Hall to the Butte where a large crowd had gathered for the occasion, and the service was conducted by the Legion Padre, Rev. D. Whyte Smith.

Following the usual program of service, Decoration of the Memorial took place with wreaths being placed on the Memorial by C. E. Reiber, on behalf of the Town; Mrs. Hunsperger for the I.O.G.E.; Col. Jull for the Calgary Tanks; Trooper Bookler for returned men; Mary Rinsheim for the Girl Guides as well as individual wreaths. The Last Post was sounded and two minutes silence was observed, followed by Reveille.

A short address was given by Col. Jull of Calgary, and Rev. D. Whyte Smith delivered a sermon appropriate for the occasion.

DIDSBURY AIR CADETS RETURN FROM CAMP

Didsbury Squadron 197 of the Air Cadets returned Saturday after spending ten days at No. 3 S.F.T.S. Calgary where they had an enjoyable outing. Cpl. Stanley Janzen was the winner of a drill team competition and as a prize had a half hour spin in a Harvard, in addition to his regular flight in an Anson, which all the boys enjoyed.

MELVIN NEWS NOTES

Cremona second place in the Bush Baseball League when they defeated Madden 14-5 at the Cremona diamond on August 12.

Cremona and Melvin played the first of a series of three playoff games at Melvin last Sunday, the score being 2-6 for the Melvin team. The second game will be at Cremona this Sunday afternoon.

OLDS TO VOTE ON WATER AND SEWAGE BY-LAWS SEPT. 10

The water and sewage system for the Town of Olds has been approved by the Department of Health and arrangements have been made to vote on the proposed by-laws on Monday, September 10th.

Total cost to provide water and sewage for Olds is in the neighborhood of \$100,000 and the By-Laws were advertised in the August 16th issue of the Olds Gazette.

The By-Laws in question are to raise money by the issuance of debentures, to bear interest at four per cent.

NOTES FROM THE WEST

Mrs. D. Hoesegood and little son spent a week visiting with her parents, Mr. and Mrs. G. Monck, who are holidaying at Radium Hot Springs.

Mrs. O. Krebs and Howard returned last week from a short holiday in the States.

Mrs. R. Hauer is spending a few days in Calgary for medical attention.

Mrs. Nix and Miss Edna Papke of Calgary spent V.I. day visiting their parents, Mr. and Mrs. H. Papke.

Mr. and Mrs. O. Blain had Mr. and Mrs. Stewart and family of Edmonton, also Mr. and Mrs. Beckum, as recent visitors.

Mr. W. Lowrie, father of Sat. E. Lowrie, died in Vancouver at the age of 81, and was buried in Calgary. Mr. Lowrie made his home in the Elktion district for several years.

Pte. W. Broadhurst returned from overseas last Friday.

A disastrous hail storm hit the Westward Ho district on the 8th, many farmers being completely hauled out for the third year in succession. On August 10th an electrical storm killed 7 head of cattle belonging to Will Carter at Cremona.

Mr. and Mrs. H. Papke attended the Mission festival held at Westcott by the Lutheran Church on Sunday, August 12th.

A large crowd gathered in the Elktion school house on Thursday, August 8th to honor the newly weets, Mr. and Mrs. Wilfred Blain. After a short program the blain couple opened the gifts which were many. Lunch was served and the crowd started home in a very bad electrical storm.

Wednesday afternoon, August 8, the Elktion Willing Workers met at the home of Mrs. C. Radke. A comfortor was tied and will be donated to the Red Cross. The next meeting will be at the home of Mrs. C. Kenschuh Wednesday, Sept. 12.

Mr. and Mrs. Wilfred Blain entertained at a wedding Sunday, August 13th. The bride was Miss Ruthie hall last Thursday and there was a large attendance.

Mr. and Mrs. A.L. Hoen were visitors with Mr. and Mrs. B. Trimble at Olds for the Oldtimers banquet and the Olds Fair on Friday and Saturday.

YOUNG PEOPLES' PROGRAM

Of special interest will be the Young Peoples' Program at the M.B.C. church Sunday, August 26th at 7:45 p.m. Rev. Norman Oko, outstanding speaker, will bring a message to young people—"Love at First Sight!"

Special numbers in song and uplifting singings will be part of the program.

Come and enjoy this service with us. A welcome is extended to all.

NEPHEW OF MRS. RINGHEIM SAVES DROWNING WOMEN

Mrs. H. Ringheim was thrilled a short time ago upon reading of her nephew's rescuing two drowning women in Ontario. The article appeared in the Herald about two weeks ago and was entitled "Legless Vet Rescues Girls." The boy is 22-year-old Cliff Wills of Niagara Falls, Ontario, who lost both legs while serving with the Canadian army in Holland.

Among those returning from overseas last week were Pte. W. A. Broadhurst, Trooper J. C. White and Russell Carleton, all of Didsbury.

NOTES FROM THE EAST

The W.I. met at the home of Mrs. Sam Elliott, with a large attendance of members and three visitors. A report from the secretary was given on the picnic. The net proceeds for the W.I.'s share was \$16.50. Mrs. Harry Richardson, the delegate, gave a very interesting and full report of the Didsbury Constituency Conference, which was enjoyed by all. Mrs. Coates told the members how the delegates and ladies who attended the farm women's week at Olds spent their time, giving notes of interest in the different classes. Many others said they would surely go next year. Mrs. Bruce won the ten cent draw. Dorothy Ball's table bouquet received first prize. Mrs. Otto Bittner was given money to purchase suitable articles for three ditty bags. It was decided that each member make a tea towel and donate it to the Lone Pine Hall. The very pleasant meeting closed in the usual manner with a lovely pot-luck lunch served by the hostess and daughter Mrs. Rathburn. Later Mrs. Rathburn took snapshots of those present.

Mrs. Bruce Shells and family spent Tuesday in Calgary visiting relatives.

Mrs. Harold Shells spent Friday in Calgary.

Mr. and Mrs. Brander and family were Calgary visitors Saturday.

Mrs. Harold Shells and Jean Coates were dinner guests at the home of Mrs. Joe Hunter and Mrs. Hunter Tuesday last.

Mrs. Harold Sittler and Sillina Deedles of Alliance are visiting with Fred Metz, also Dick and Harold Metz.

Mrs. Hughes is ill in the Didsbury hospital and sincerest wishes are extended to her for a speedy recovery.

A large number from the east attended the Olds Fair, including Mrs. Dowell, Roy and Evelyn, Fred Metz, Mr. and Mrs. Otto Bittner and family.

Say folks! Did you know—ding bells are tingling out in the district again. Out around Milne's and Lockman's, around the Jenkins home. They say it's catching, so you better look out, Freddie.

Dance at Keiver's Lake on the 24th sponsored by the I.O.O.F. Music supplied by the Sunny-slope orchestra.

Miss Zoek is to be congratulated on her new position in the Didsbury hospital. From all the prizes Miss Zoek was awarded on her balking at the Didsbury Fair, we know patients will be well fed.

We hope Mrs. B.A. Wood's foot, which has been out of walking commission, has improved by now.

Frost has damaged gardens both Saturday and Sunday nights, in the Jutland district.

Miss Margaret Sinclair returned Sunday after spending the past six weeks in Calgary.

The regular monthly meeting of the Legion will be held on Saturday, August 25th—on the West.

Chief Petty Officer Kiffer Stauffer, RCNVR, left for Ottawa Thursday after spending the past month with his mother, Mrs. A.A. Stauffer.

Mrs. Sexsmith, who recently sold her house in town to Mrs. Morton, has moved to Calgary to reside.

Mr. O. Gilmore's purchased Hereford bull took the Grand Champion award at the Olds Fair last week.

Born to Mr. and Mrs. H. Folk man at the Didsbury hospital on Friday, August 17, a daughter.

Dr. and Mrs. Fawcett of Nanton, Rev. V. Fawcett, and P.O. and Mrs. Fawcett were Didsbury visitors Monday on their way to Edmonton.

WESTCOTT NEWS ITEMS

The many friends of Mrs. Linden Jacobson of Westcott are pleased to hear that she is greatly improved in health after undergoing surgery a week ago at the Didsbury hospital.

Miss Delaney Gaejen accompanied Mr. Chas. Cobis on a holiday to the west coast and while there will attend the wedding of her aunt, Miss Esther Gaejen of Chilliwack, B.C.

Miss Janet Leighton of Edmonton has been visiting her aunt and uncle, Mr. and Mrs. John Stevenson at Westcott this past week.

HARMATTAN NEWS NOTES

LAST WEEK

Hail struck this district last Thursday night and damaged many crops and gardens. We understand windows were also broken.

Mrs. Neilson, who has been taking care of her daughter, Mrs. Wm. Turnbull who has been quite sick with the flu, was called to her son's side, Mr. John Neilson of Saskatchewan, who is said to have typhoid fever.

We regret to hear that two girls of this district were removed to the hospital with the flu, namely Leone Lindsay and Zelle Brower. However, both girls are recovering now.

The Marshall Armstrong and Jack Wiper families have returned from their holiday in Banff.

Miss Jean Johnson is visiting in Calgary with her grandparents, Mr. and Mrs. Kinarva.

Mrs. Geo. Fagan is ill in a Calgary hospital and we wish her a speedy recovery.

THIS WEEK

Frost visited the district for two successive nights the latter part of last week.

Miss Alice Foreh is working at the Wm. Turnbull home until Mrs. Neilson returns from Saskatchewan. We are pleased to hear that Mr. John Neilson had only the flu.

Mr. and Mrs. Harold Gilmore, Sam and Pearl, who for many years have resided in this district, have left to find a climate better for Mr. Gilmore's health.

Mr. and Mrs. Geo. McDonald and Mrs. A. Gilmore attended a birthday party for Mr. Geo. Innes of the Springside district Saturday night.

Quite a few from here took in the Airforce Day in Calgary.

NEW AGENCIES IN TOWN

Mr. W. H. Payne who has just returned from overseas where he was with the Calgary Regiment (tanks) and a former resident of Innisfail, arrived in town last week and has opened an office in the old Fisher-Edwards building. He will be local agent for Dodge and DeSota cars, as well as Gas and Oil Products Ltd.

CROP PROSPECTS IN DIDSBURY DISTRICT ARE EXCELLENT

Some Damage Feared By Week End Frosts

With plenty of moisture during the growing season crop conditions in the district are ideal this year, and if frost will only hold off, this part of Alberta will produce one of the best grain and feed crops in its history. Frost was reported Sunday night, and no doubt has done some damage west of the Dog Pound.

Hail damage to date has been negligible and warm weather the first three weeks of August, accompanied by the occasional shower, has brought the grain on rapidly. Some farmers are now cutting barley, and further east of town it is expected that early wheat cutting will commence this week end, although this will not be general.

Hay crops have been good and pastures are excellent for this time of year.

Seeding was late this spring and a large acreage usually sown to wheat was put into coarse grains. For this reason harvest will come on more rapidly than usual, owing to early maturity of oats and barley, and a normal harvest season should result.

JOSEPH E. GOURDINE LAID TO REST AUG. 13

Mass was celebrated by Rev. Father MacLennan in the Didsbury Catholic church, Monday, August 13th at 10 a.m. for Joseph Eugene Gourdine, who passed away on August 10th in his 84th year. He was born at Namur, Belgium of French parents, and lived at St. Sixte, Quebec after coming to Canada, where he was married. His wife predeceased him before coming to Didsbury in 1929.

Mr. Gourdine was a contractor and had the misfortune to lose his sight in an explosion but through all the years he never lost his cheerful and genial manner and was a highly respected neighbor and friend.

He is survived by one son, Ernest, with whom he made his home in the Zella district; a daughter, Mrs. Beaudoin Chabmely, Canton, Quebec; three grandchildren; also by four sisters and one brother in Eastern Canada.

Interment took place in the family plot of the Didsbury cemetery with the following pallbearers: E. Dugas, J. Le Clair, J. Gourdine, Honore Gourdine, Abold Gourdine, and Albert Gauthier.

Herb Fisher was in charge of the funeral arrangements.

Canada's Progress

IT IS APPARENT THAT CANADA is emerging from the war with greatly increased maturity and with high prestige among the other nations. Although the people living here make up only one per cent. of the population of the world, Canada has ranked second, third or fourth from the top in many fields of service to the Allied cause, and at the Bretton Woods conference, where it was a "realities ruled" Canada was given seventh place among the nations, according to a standard based on national income, foreign trade and holdings of gold and foreign exchange. At the recent World Security Conference at San Francisco, Canada proved to have influence and authority when her delegates took part in the discussions there. In working together for victory, Canadians have demonstrated their ability to successfully carry out great undertakings, and they also brought about a ruler realization of the great potentialities of their country, both here and in other lands.

Future Hard To Predict

It has been said that "never before has there been a time when it was so hard to read the face of the future," and there is much truth in that opinion. Experiences in the pre-war years do not lead us to be over-optimistic, for there are few Canadians who can remember the tragedy of unemployment and depression. There remains, however, the picture of what our people were able to accomplish for war, and there is every reason to believe that with continued determination and co-operation we could deal with the problem of peace. War conditions created abnormal demands for labour and unusually favourable markets for our products, both at home and abroad. It is clear that the return to normal conditions will necessitate a change in our present economy, and unquestionably the problems involved in this are far-reaching and of the utmost complexity. When compared, however, to the problems of production, shipping, and other branches of the war effort, which had to be speedily and effectively solved, they do not appear as impossible and it is not unreasonable to hope that they can be overcome.

Foreign Trade Is Important

It is agreed that much of our hope for the future lies in maintaining and expanding our foreign trade. Figures show that before the present war, the sixteenth leading nation, only three were more dependent on foreign trade than was Canada. The question of markets for agricultural products is a matter of vital concern to a large proportion of the people here. This is being dealt with both by domestic and international bodies, and efforts are being made to maintain these markets through measures to increase the consumption of food, and the use of other farm products. Dr. Eric England, chief agricultural economist of the office of foreign agricultural relations, United States Department of Agriculture, told a recent national gathering of the Canadian Society of Technical Agriculturists at Saskatoon, that results of these efforts might be slow, and that "farmers could expect no magic formula whereby markets for their products would appear overnight." A reasonably high level of employment is necessary to provide markets and adequate prices for all our products, and this may be one of the greatest problems which Canadians must solve, if we are to continue to progress.

Blockade Runners

Got Through The North Sea With Precious Cargoes.

Sir George Binney, commander of British blockade runners in the North Sea, told the full story of how he and his men brought out 35,000 tons of precious raw materials from Sweden during the war years. Under cover of fog, snow and long northern nights, he defied the German blockade of the Skagerrak—the water approaches to Sweden—for more than four years.

Sir George commanded about 100 British and Norwegian merchant seamen. The cargoes they brought from Sweden could not be obtained anywhere else in the world. They included special steel tires such as ball bearings and 20 machines which increased British production of aircraft engines by 100 per cent.

These machines were so valuable that special soldiers were sent to protect them against air attacks. The supplies obtained from Sweden were shared by war industries in the United States and in various parts of the British Commonwealth. Eventually they were able to reproduce the Swedish equipment.

SIGHT RESTORED

An article in Soviet News said that 40 per cent. of blinded soldiers treated by Russian doctors during the war left hospital with their sight restored to a considerable extent.

What is worth \$5 And Sells at 10¢?

You know that a 10¢ package of WILSON'S FLY PADS will save you \$5.00 worth of work when you use WILSON'S FLY PADS.

Canadian Art

Sketches By Canadian War Artists Were Shown In Holland

The exhibition of war colors and the sketches by Canadian war artists was shown at the Amsterdam Municipal Art Gallery and attracted many Dutch visitors as well as army personnel.

The pictures are examples of work done by artists of the Canadian Field Hospital, and are being shown in Holland before being shipped to Canada for exhibition in Ottawa and other cities of the Dominion.

The exhibitors are Maj. C. F. Confort, Captain G. D. Pepper, Captain O. F. Fisher, Captain C. P. Tuning, Captain D. A. Colville and Lieutenant R. J. Bobak and the subjects include portraits and typical battle-field landscapes garnished with the letter of war.

"These pictures have brought to Amsterdam a new spirit in painting," assistant curator van Leyden commented. "They have directness and a free, courageous attack which reminds me of your soldiers themselves. They are pictures without problems, full of action."

Big Bounty Payment

Every Man In Royal Navy Will Get His Share

A handsome cash "bounty" payment from a jackpot that already exceeds £19,000,000 (about \$84,500,000) awaits every man in the royal navy.

It's a tradition in the royal navy that a bounty be distributed among seamen. The admiralty prize court, which rules on the disposition of all captured goods, has collected and earmarked for distribution among men in the £19,000,000 from proceeds of the sale of cargoes of enemy ships captured by the navy during the war.

Many of China's tin mines have tunnels so small only children can crawl through them.

Price Control And Rationing Information

Q.—What is the value of the "P" coupon?

A.—"P" coupons are the same as preserves coupons and have the same coupon value of half pound of sugar or standard amounts of commercially packed preserves.

Q.—When will meat be rationed?

A.—Meat will be rationed as soon as the rationing system can be worked out in detail. In the meantime consumers are asked to conserve meat voluntarily by observing meatless days in their homes on Tuesdays and Fridays.

Q.—May farmers still slaughter without a permit if the meat is for their own use?

A.—Yes, they may, but under new slaughtering regulations and excess over these requirements must be sold only to the holder of a slaughter permit who must in turn stamp the meat and submit a record of purchase.

Q.—Is it against the regulations to sell a dress without labels of price tag?

A.—Yes, it is. Since May 15 it has been necessary to have labels placed on wearing apparel, as well as many other lines of merchandise. The labels must state the WPTB license number, the line number and size.

Q.—My restaurant now only serve butter with meals and none with light lunches such as salads, omelets, etc. Does the Board allow this?

A.—Restaurants and other public eating places are on quotas for butter and are not required to serve butter at all meals or with special orders.

Please send your questions or requests for the pamphlet "Consumers' News" or the Blue Book in which you keep track of your selling prices, mentioning the name of this paper to the nearest Wartime Prices and Trade Board office in your province.

SMILE AWHILE

Yes, my wife gets more out of a novel than anybody.

"How's that?"

"Well, she always starts in the middle, so she's not only wondering how it will end, but how it began."

You look strong enough to work and earn a living.

Tramp: "Yes, ma'am, and you look beautiful enough to go on the stage. But we both prefer to lead a quiet life."

Business man rushing to the Labor Exchange: "I say, I'm looking for a lady."

"That we sent you one yesterday," replied the clerk.

"Yes, that's the one I'm looking for."

"According to the law of supply and demand—" began her husband, who liked to explain things.

"No one demands anything at a store now, dear," she interrupted; "it's the law of supply and demand."

The after-dinner speaker had talked for 15 minutes.

"After parting of such a meal," he continued, "I feel if I had eaten any more I would be unable to talk."

From the far end of the table came an order to a waiter: "Give him a sandwich."

"The office boys at our place had a sit-down strike for three weeks last month."

"A sit-down strike for three weeks? Goodness, why didn't you settle it sooner?"

"Because it was that long before we realized they were striking."

Before the hostilities with Germany ceased, a Yorkshireman visiting London for the first time found himself in a certain famous thoroughfare.

"Which side is the War Office on?" he asked a passing soldier.

The soldier, looking rather startled, exclaimed: "On ours, we hope."

Hubbard: "You're not economical enough in these times; you will have to alter or else you will ruin me."

Wife: "Well, if you don't call a woman economical who saves her wedding dress for a possible second marriage, I'd like to know what you think economy is."

Father: "You ought to be ashamed of yourself, not knowing what you learned at school today, Willie Brown always knows."

Bobby: "Yes, but he hasn't so far to go home."

Reindeer in Canada and Alaska are usually brown and grey in color.

T.C.A. Pilot Wins D.F.C.

Now piloting one of the planes of Trans Canada Air Lines between Winnipeg and Toronto, J. Wendell Reid, of Sydney, N.S., who at 21 was one of the Empire's youngest wing commanders, was called to Ottawa recently to be decorated personally by the U.S. Ambassador to Canada.

With the United States Distinguished Flying Cross.

The citation assigned by Lt. General Carl Spaatz, U.S.A.F., says: "For extraordinary achievement while participating in many patrols over the Normandy Beach head area. As a result of his outstanding leadership, W.C. Reid's squadron has destroyed at least 20 enemy aeroplanes since D-day. His courage, skill and devotion to duty reflects highest credit upon himself and the armed forces of his country."

Reid, who is now a first officer with T.C.A., was a licensed pilot at 17 and winner of the Webster Trophy as the best Canadian pilot in the Maritimes.

Reid, who is now a first officer with T.C.A., was a licensed pilot at 17 and winner of the Webster Trophy as the best Canadian pilot in the Maritimes.

Justice Meted Out

German Soldier Is Sentenced To Ten Years' Imprisonment

A 22-year-old German soldier was sentenced to 10 years imprisonment by a military court in Flensburg for shearing the hair off two German women whom he accused of giving information to British authorities.

The court found Lieutenant Hans Pigeot, who has been awaiting demobilization, guilty of leading a gang of a dozen German soldiers in a hair-cropping sortie against two married women named Musche and Schippe, both between 35 and 40 years of age.

The women were pulled along a road by their hair and the ring-leader of the gang ordered three of his men to cut off their hair which was then stuffed into the women's mouths.

The court found Lieutenant Hans Pigeot, who has been awaiting demobilization, guilty of leading a gang of a dozen German soldiers in a hair-cropping sortie against two married women named Musche and Schippe, both between 35 and 40 years of age.

Here a CWAC

There a CWAC

MEET A CWAC—

"The smartest dressed girls in the world," are made and kept that way by C.Q.M.S. Mary Scholey of Ryerson, Sask. and her staff. Mary is the Quartermaster Sgt. in charge of No. 12 CWAC Composite Stores, R.C.A.M.C., Sask. Her job is the supervision of outfitting recruits, replenishing "issues" that have worn out and seeing to it that the girls have that "smartly turned-out" look at all times.

C.Q.M.S. Scholey and her sister, Betty, enlisted at the same time in May, 1942, and received their basic training at Vermilion, Alta. Later Mary was sent to Ottawa where she took a Quartermasters' Course. From there she was posted to the Q.M. Stores at the Dundurn Military Camp, Dundurn, Sask., where she was promoted first to the rank of corporal, and then to the rank of sergeant. Posted to Regina Q.M. Stores in April, 1943, she became a C.Q. Quartermaster Sgt. in Sept. of the same year. Mary has a pleasant smile and a willing ear for all the girls' little difficulties and troubles on Q.M. parade, but no matter what it is, she's always there to lend a helping hand.

"My sister Betty," C.Q.M.S. Scholey informed me, "has just arrived in England, where she has been posted to Central Registry, Headquarters, London. We were born in Yorkshire, England; you know, so of course my one great love and dream is that one day I may be fortunate enough to join her."

CWAC COOKS' COURSE—

"As far as the Army is concerned you can't have too many cooks, so the old saying about the broth is all wrong." The largest number of cooks ever to graduate at No. 1 Canadian Women's Army Corps Training Centre, London, Ont., completed their nine weeks' training recently. They were addressed at a graduation tea last night by Daisy I. Ross and Capt. Phyllis Laird, Director at the Directorate of Supplies and Catering, N.D.H.Q., Ottawa. "I'm sure you realize the importance of your work because the health and happiness of all the men and women in the service depends a great deal on the food the cooks turn out," said Capt. Laird. The following girls were members of the graduating class: From Sask., E. M. M. Lepp, C. From Sask., G. H. Greaves, Marjorie; E. J. Irvine, MacDonald; G. Slater, Fort Pitt, from Alta.; M. E. Berry, Edmonton; C. P. McKelvey, Sarnia; I. Miller, Provost; E. C. Wierma, Vulcan.

"IN NIGHTS TURN TO OUT NIGHTS"—

At first we all agreed that we would certainly like to shoot the person who invented "in nights." That one night in the week when ALL, period, must just had to remain in barracks, and be tucked safely in bed by 10:15. Of course that was the one night in the week when one felt in the mood to go out, even if you stayed in all the rest of the week for such is human nature! It had to be a very special and rare occasion before one even dared approach the Platoon Sgt. and plead in a very timid little voice, "Please, my fabulously rich great uncle is passing through town and could one Dr. Smith PLEASE get permission to see him?" On "in-

night" it had been our custom to attend lectures, have ARCA discussions, view Educational films, etc., the fact that all these were compulsory was the reason, really, why we chortled and grumbled now and then. With the approach of long warm summer evenings all this has changed, our "in nights" have become "out-nights." Now please don't jump to the conclusion that we can do exactly what we please, for such is definitely not the case, but we do have a splendid variety of organized outdoor sports in which we can indulge. There's a choice of riding, bowling, roller skating, swimming, cycling and hiking—and for those who insist—upon being difficult and find none of these enticing, there is always that good old "agonized sport" of choosing the broom and duster around the Recreation Hut. Strange to say we are very very interested in the "in nights-out-nights" have become most popular.

SHELL SAY IT EVERYTIME—

Pte. Buttercup: Why is a Platoon Cpl. more annoying than a fog horn?

Private CWAC: I don't know. Why?

Pte. Buttercup: Because a foghorn only blasts every two minutes, but a platoon corporal blasts us all the time.

WELL, SAY IT EVERYTIME—

Pleasures are all alike, simply considered in themselves. He that takes pleasure in being a soldier enjoys himself as much as he that enjoys plays. John Selden.

No pleasure is comparable to the standing upon the vantage ground of truth. Francis Bacon.

The difference between false and true pleasure is this: for the true, the price is paid before you enjoy it; for the false, after you enjoy it. John Ruskin.

False pleasure will be, is, chastened; it has no right to be at peace. —Mary Baker Eddy.

Well may your hearts believe the truths I tell: 'Tis virtue makes the bliss, wherever we dwell. William Collins.

Tranquil pleasures last the longest; we are not fitted to bear long the burden of great joys. —Boetius.

WORLD DEVELOP. ARCADE

Free interchange of scientific knowledge between Canada and Russia as an immediate aftermath of the war will play a notable part in the development of the Canadian Arctic, Dr. A. James, professor of economics at the University of Toronto, said in an interview.

Canada's Mountain Playgrounds Have Been Revealed To Many As A Great National Heritage

MOUNTAIN dwellers may sometimes boast that the pictures on the walls of their homes are superfluous because they have a magnificent alpine view framed within every window. Visitors to Canada's mountain parks must surely have the same feeling when they look out of their windows. The pictures on the walls of their rooms must seem mediocre by comparison with those masterpieces of nature for which the parks have become justly famous.

Jasper National Park, with its 4,200 square miles of alpine beauty, is a vast sea of snow capped peaks. Its glistering glaciers, deep canyons, turbulent rivers, cascading waterfalls, exquisite lakes and peaceful flower-bedecked valleys make it one of the greatest mountain playgrounds in the world. Within its wide boundaries roam some of Canada's finest big-game animals. Through it winds the Athabasca Trail where once passed a cavalcade of explorers, fur-traders and adventurers in the early days of travel to the Pacific Coast.

Banff National Park is distinguished not alone for its superb scenic attractions but because it was the first Canadian Territory set aside as a national park. From an area of 36 square miles, reserved 60 years ago around the hot mineral springs, the park has been extended until it now contains 2,585 square miles stretching from the rolling foothills on the east to the continental divide on the west. It contains widely-known alpine resorts, Banff and Lake Louise, besides the Upper Hot Springs, and many other features of interest. It is now connected with Jasper Park to the north by one of the greatest scenic highways on the North American Continent. Few places in the world enjoy a wider international reputation for scenic charm than Banff National Park.

Waterton Lakes National Park to the south and Kootenay, Yoho, Glacier and Mount Robson National Parks to the south and east of Banff complete Canada's mountain playgrounds with a combined area of nearly 2,600 square miles. Each has an individuality and appeal distinctly its own, and all are natural wildlife sanctuaries. They are connected with Banff and Jasper by good motor roads—except Glacier National Park, which is accessible by railway only. All of these mountain playgrounds have been provided, in varying degrees, with accommodations and recreational facilities for the travelling public, and plans for further development in that direction are merely awaiting a return to normal peacetime conditions before being put into effect.

Canada's mountain playgrounds may be expected to provide rest and recreation for an ever increasing volume of tourists in the years that lie immediately ahead. Much of the territory covered by these great mountain parks still remains largely unexplored. Their extent is so immense that they could serve as playgrounds for millions and their beauty so varied that it is forever fresh and breath-taking.

It is most desirable that all Canadians should be aware of this great national heritage—their mountain kingdom. It belongs to all of them, and as national parks, will be preserved inviolate for their descendants.

Chinese Aviator

A Canadian-born Chinese, who has been flying goods to China, Capt. Thomas Wong, 25, Canadian-born Chinese pilot, arrived in Montreal on leave, said that after the necessary supplies have been collected in the Far East, "a couple of months will be enough to lick the Japanese." Wong, a native of Moose Jaw, Sask., has been flying supplies into China from India.

He is a member of the China National Aviation Corporation, an affiliate of Pan American Airways, but has been assigned to the United States Army Transport Command. He has been flying the "Hump," the name given by flyers to the Himalaya mountains, for 15 months and has completed a log of 1,500 flying hours.

THIS VERY BIRD

If all the kind deeds never done
Should blossom into flowers
The earth would be a paradise
This very hour
And if the dear words never said
Found utterance to-day
The winter in a million hearts
Would turn to May
If all our good intentions were
Pushed on to gracious deed,
I think their power would promptly
end
The age of greed.
—Albert Durrant Watson.

Postage stamps were issued for the first time in 1840 in Great Britain.

Develop Trade

United Kingdom Market Holds Improved Prospects For Canada

The United Kingdom market holds greatly improved prospects for sale of Canadian goods provided Canada becomes more available for British exports, Col. W. G. Abel said at Vancouver.

Col. Abel, who until V-E Day directed Canadian Army public relations overseas, for some years before the war was engaged in promoting Canadian sales in the United Kingdom. Directing European operations of MacLaren Advertising Agency in London, he conducted the successful "Canada Calling" campaign for the Canadian government.

In an interview Col. Abel said: "Interest in the United Kingdom market is quickening everywhere, but caution against over optimism that normal trade can be restored immediately must be stressed. Restrictions necessitated by war cannot be immediately be brushed aside for many reasons."

"Still there are fine prospects for those who wish to go after the market and do so wisely. Prior to outbreak of hostilities the Department of Trade and Commerce was providing very practical leadership to Canadian exporters. No other country ever made such a workable bid for the United Kingdom market on behalf of their nationals. Too little has been said in the way of appreciation, but perhaps government departments are usually modest."

Having seen exporters and importers across Canada, I return to the United Kingdom thoroughly satisfied that a great forward step will be made in interchange of trade between Canada and Britain. What seems most hopeful is the fact that the need for this is clearly understood and goodwill appears to run high."

SAFE-GUARDED STATUE

The Venus De Milo, celebrated Greek statue, has been returned to the Louvre in Paris after being hidden for five years at Valenciennes Castle on the River Loire. Together with 800 other Louvre treasures, the armless figure was secretly taken to Valenciennes to escape the Germans after the war began.

Soldier Went Back

But Dunkirk, He Saw The Second Time Was Different
Gordon Webb, London Daily Sketch correspondent, says:

This is the story of the man who went back to Dunkirk to complete the cycle of his travels, and see again the place where victory was first moulted out of the chaos of retreat.

He is Sergeant Jack Christian of the Welsh Guards, and we kept our anniversary appointment on the beaches of Dunkirk.

Together we went over, and found the exact fold in the sand dunes where, five years ago, he lay crouching under a rain of German bombs, waiting for the "little ships" to take him across the sea to safety.

His first words when we reached the fringe of the dunes were: "Thank God Dunkirk was in 1940. If our chaps were trying to get off the beaches today there wouldn't be a man left alive."

It was true. In place of the lake-like sea of 1940 a gale was whipping up waves which would have swamped any small craft in a few seconds.

"It all looks so different now," Sergeant Christian kept repeating. "If it were not for the peculiar contour of the dunes here I would never have found the spot. We had no shelter but the hillocks and holes scraped in the sand with our bare hands."

"Now look at the shelters and fortifications Jerry has built. There's concrete everywhere."

The Welsh Guardsman breathed deeply. "We stood in a queue in the 'spec' he added, 'waiting as the stream of small craft came ashore."

"After one and a half days in the queue, my turn came to move. Twelve of us waded out to a flat-bottomed boat."

"I suppose we were beaten and didn't know it. I'm glad we didn't know it, or refused to believe it."

We climbed on top of a German concrete gun emplacement. The air shook with detonations as Germans exploded their own mines under British direction. A forest of iron stakes lined the beach, part of the German fortifications against invasion.

Sergeant Christian chuckled. "It's nice to see Jerry lifting his own mines. I bet our other Dunkirk boys would like the chance to watch them at it."

NO WHITE BREAD

Lack of shipping makes the re-introduction of white bread into South Africa impossible for the time being. The added importation of 900,000 bags of wheat required for standard bread would necessitate a cut in provisions now being sent to Europe.

EXAMINE PROCESS

British food experts are examining German factories which have been making sugar from sawdust but there is no indication yet that similar establishments will be set up in Britain.

Solar Storms And Sun Spots Are Believed To Be The Cause Of Northern Lights Displays

(By John A. Marsh in Ottawa Journal)

THERE are few phenomena that occasion more controversy or command more attention than the Northern Lights. Their technical name—the Aurora Borealis. From the earliest history of man this spectacle has captured the imagination of primitive peoples, and theories of their origin are many and varied. Every year, Summer and Winter, we have displays of great beauty and variety.

The farther North we go the greater is the beauty. Last August from a Northern airport in Alaska, I watched the sun sink slowly behind those wonderful mountains followed by a display of Northern Lights. I shall never forget. At 10 o'clock a very foggy white light took the form of a gigantic half circle in the North and then slowly from this cupola there rose, first one brilliant streak of light and then another, reaching almost to the zenith overhead. Clusters of colored lights appeared with minaret and spiky towers, flickering yet somewhat stable in contour.

Travelers in the Arctic Circle and south to whom the midnight sun is a common sight was eloquent in their description of the glory of the Aurora Borealis among the fields of ice. In less Northern latitudes the streamers are just faintly tinged with color, but in the North every color of the spectrum can be seen with infinite shades in between.

The Norsemen had many poems about the Aurora Borealis and the North American Indians, less both with city lights and motor cars than we, wrote many legends about them. The Northern Lights and the Milky Way are more frequently mentioned in Indian legend than any other celestial phenomena.

"Many things Nokomis taught him. Of the stars that shine in Heaven. Showed the broad white road to Heaven. Pathway of the ghosts, the shadows. Running straight across the sky. Crowded with the ghosts, the shadows."

Of the Kingdom of Pen-emah To the land of the hereafter."

It seems curious that in so many branches of natural science, we grow so slowly in education. I distinctly remember a teacher in public school telling us that the Northern Lights were caused by the sun shining on the icebergs of the North. Had she said that they were caused by the sun shining on the polar bears of the North she would have been just as close to the truth and as far away from it. Nevertheless we cannot blame her too much. The Northern Lights are still shrouded in mystery. This much is known. An examination of electrical storms confirms the theory that there is an ionized layer in the upper atmosphere of the earth. Variations in this ionization are due to charged particles coming from outside our earth's influence and for the most part from the sun. The most obvious sign of this lies in the luminosity produced in the Aurora. The delicate draperies consisting of straight-line streamers ending on the lower side in sharp bright boundaries, are what might be expected if we had ionized clouds of gas coming into the earth's atmosphere along paths determined by the earth's magnetic field.

The foregoing is rather technical. In short if we were to define the cause of the Aurora Borealis in as few words and as simply as possible our definition would be this: Our earth is a great magnet, the sun likewise. Each has a magnetic field—that of the sun being many thousands times greater than that of the earth. When the sun is agitated by great spots or storms that appear spasmodically on its surface the magnetic field of the sun embraces that of the earth and we have celestial fireworks which make their appearance at the North and South Poles of the earth. In our hemisphere they appear as the Northern Lights, in the Southern hemisphere the Southern Lights.

Thus we see that sun storms and the Aurora Borealis have an undoubted affinity; and when we see brilliant displays of Northern Lights we can be assured that there are also huge storms on the sun, and that all sympathetic phenomena on earth that accompany sun spot phenomena will also be noted when there are brilliant Northern Lights.

When the sun has an epidemic of storms or spots we experience on earth the following phenomena: Disturbance of the magnetic needle, electrical storms, radio static, interference with cable dispatches, and uncertain weather. In Alenia, France, in 1928, the most spectacular display of Northern Lights in years took place. Astronomers reported very great sun-spot activity. Many telegraph stations were disturbed by

electric sparks, and in one a telephone clerk received a shock that paralyzed his arm. Sentences of grim nonsense and collections of consonants unpronounceable in any language were spelled out that night before astonished telegraph clerks whenever they tried to send a message or receive one. Meaningless messages which apparently came from nowhere were received everywhere. Much collaborative evidence over a period of years confirms the electrical nature of the Aurora Borealis.

To study the heavens and the things of wonder upon the earth, is to realize the complexity of creation and the great orderliness of a universe both on our earthly planet and in the depths of the Milky Way.

Largest Airplane

Monster Flying Boat Being Built In California

The world's largest airplane—a flying boat—of such size that it could only be exhibited in sections, has had its first preview recently and left the previewers astounded.

The plane is being built at the Howard Hughes plant at Culver City, Calif., and has been named the Hercules. Here are some statistics announced by the company:

Cost: In excess of \$20,000,000.
Weight: 425,000 pounds.
Wingspread: 320 feet.
Hull: 220 feet long, 30 feet high, 25 feet wide.
Engines: Eight in all, each of 3,600-horsepower capacity.

Cargo capacity: 14,000 gallons. The Hercules, begun in 1943, will not be ready for flight tests before next January. There are no plans for duplicating the monster ship.

The Hercules will be able to carry a 40-ton tank with full complement of armor and men. Or, it can carry three light tanks and equipment. It can become a mobile hospital, with 350 patients on stretchers, surgery facilities and plenty of doctors and nurses. And it could, engineers say, carry 750 soldiers equipped.

The Hercules will have a top speed, engineers say, of about 218 miles an hour and a cruising speed of about 175 miles per hour.

Pansy Favorites

7421

By Alice Brooks

Pansies are at their best on table linens, towels, scarves. The rich colors are eye-catching, the simple embroidery, relaxing.

Draw up a sketch you already have, or a plain new one, with pansies. Pattern 7421 has transfer of 12 motifs, 2 1/2" x 2 1/2" to 3 1/2" x 3 1/2". To obtain this pattern send twenty cents in coins (stamps cannot be accepted) to Household Arts Department, Winnipeg Newspaper Union, 175 McDermott Avenue E., Winnipeg, Man. Be sure to write plainly your Name, Address and Pattern Number. "Because of the slowness of the mails delivery of a pattern may take a few days longer than usual."

SMALL BUT SPEEDY

The speed of the humming bird is extremely difficult to determine, since its flights are short and spasmodic but tests have shown that no bird can make a short dash with the speed of the tiny hummer.

Bees sometimes go five miles after food, but the usual maximum distance is about a mile.

TIME FOR ACTION ON WATER AND SEWAGE

As long as the war was on it did not seem an appropriate time to start on any scheme to raise money for public improvements, especially those which could be held back for post war construction, thus providing work for a large number of our boys returning from overseas. Now, however, all this has changed, with the world at peace, and we will be called on almost immediately to commence our plans of providing employment.

Didsbury's No. 1 public improvement and unemployment plan is the construction of a water and sewage system, and provision should be made immediately to decide on the plan by a vote of the tax payers.

Our Town Council has been keenly aware of the necessity for providing water and sewage here, and a year or so ago had consulting engineers draw up a plan for Didsbury, together with the estimated cost. The Council early this year approved the plan but have been waiting for favorable conditions before submitting the question to the ratepayers for approval. With the war over and the town and district financially sound, conditions generally are favorable for the taking of a vote and it is to be hoped that the question will not be long delayed.

BLUE RIVER ROUTE

Opening of the Blue River section of the main highway leading from Edmonton to Vancouver by way of Kamloops to general traffic does not appear likely before

1946. One party which drove over the highway recently arrived at Edmonton. These men said that in one particular part of the road they had great difficulty getting through and it was evident that the road will not be open for general traffic before next year.

Work is still proceeding on the section between Jasper and Blue River, this having been "cut through" in the fall of 1944. But it is apparent that a great deal of work must be done yet before the road will be available for general through traffic purposes.

The Blue River section is an important link in our highway system and is a road that will attract countless tourists to our province in the years ahead, and it should be completed as soon as possible.

Alberta can afford to build the best highways that engineers can devise. We have attractions far beyond the dreams of the average motorist and when tires and new cars are available it will be the country with first class roads that will reap the benefit. The gasoline tax alone paid by tourists will build modern roads and pay dividends in the years to come.

WATER VERSUS AIR IN COOLING MILK

If a can of warm milk is placed in a refrigerated room where the air temperature is at freezing point it will take 12 hours before the temperature of the milk has fallen to 50 degrees F. That is because air absorbs heat very slowly. Water absorbs heat much more quickly than air. Because in cooling milk with water, the larger the volume of water and the lower the temperature, the more quickly the milk will be cooled. Cooling is more rapid when either the milk or the water or both are kept in motion. The value of stirring the milk is a matter of commonplace knowledge on the farm, but the idea that equally good results may be obtained by stirring the water is not so well known. In stirring milk there is a risk of adding bacteria

if the stirring rods are not thoroughly washed and sterilized. The better method, therefore, is to stir the water by means of a propeller driven by a small windmill or by an electric motor.

WHERE THE TENNIS BALLS WENT IN EUROPEAN WAR

23 million tennis balls—the United Kingdom's wartime output—were used by British industry in a brilliant plan to defeat the German magnetic mine. Early in the war experts were asked to solve a major problem which was threatening the success of Britain's new mine-sweeping technique. This technique involved the use of mine sweepers which towed behind them each about 500 yards of electric cable. Powerful electric current generated

inside the ships, was to be passed through the cables into the sea, and thus explode all mines in the area by the electric discharge. But the cables had to be made to float. This was the stumbling block the scientists had to overcome. They soon hit upon the simple solution; it was to carry the electric wires on a cable made of tennis balls, pressed and packed tightly, one after another to form one long self-buoyant cable. The plan was entirely successful.

3-4-D

The importance of DDT in controlling insects is well known to most farmers. At least, it soon will be, since limited quantities are now or are about to be available for use in stables, dairies, etc. If preliminary experiments are confirmed, 3-4-D, or if the reader disdains nicknames, 2,4-dichlorophenylacetic acid, will be equally important in weed control. It will destroy a wide variety of annual and perennial weeds, but appears to be harmless to grasses. Extensive experiments by Provincial and Dominion Departments of Agriculture are in progress and we await the results with interest.

Farm Granaries, Again!

At this season, with most granaries empty, farmers may do much to prevent later losses from heating and infestation of farm-stored grain. Empty granaries should be thoroughly cleaned. Brush down walls and sweep floor with damp sawdust; then sprinkle a little hydrated lime over the floor and sweep it about to fill all cracks. Repair leaky roofs, walls, and especially, floors. Where floors, either wooden or concrete, rest directly on the ground, a covering of moisture-proof paper over the floor and extending up the walls for a foot or so will help to exclude ground moisture. Provide for good ventilation over the surface of the grain. A little effort now may save a lot of trouble later.

A PONY COURSHIP

(By a neighbor of Wilfred Blain)

I'll tell you a story of one you
know well,
A neighbor, a schoolmate, a pal,
A young Lochinvar, so they all tell
How his steed helped to win him his gal.

His girl friends though many, he
all seemed to dodge,
And he seemed in no hurry to
marry
Till he found a Pearl more precious
than gold,
And he thought he'd no longer
tarry.

So onto his steed, so gallant was he
No! that "Burma Road" won't stop
me;
Around curves, up hills, with heart
so free,
Seeking the fair lady's company.

Home he dangles, that daring
young knight,
To do up his chores and see every-
thing right;
Back in the evening he wooed her
Till Mr McMullen thought it a
fright.

'Twas early one morning, the birds
were singing,
The rooster was crowing and along
he came swinging,
Pop McGiffin was milking his cow,
He looks up and says,
'What! You just going home now?'

Now he travelled late and he trav-
elled long,
And the scenery to him became
dreary;
We knew the crisis was coming
soon,
As the pony was getting weary.

So one rainy day when he couldn't
make hay,
The wedding bells were ringing,
He up and takes himself a wife,
And tonight his bride he's bringing.

Now listen young fellows, here's a
lesson to learn
If for a young lady you yearn:
Don't let the mud stop you,
Be up and do,
And maybe you can make your
horse carry two.

EMPIRE TOLL OVER MILLION

The total casualties to all ranks
of the British Commonwealth and
Empire forces during the 5½ years
of war to May 31 last were 1,427,
634.

Exclusive of civilian casualties
and casualties to merchant seamen
and members of the Home Guard
the total was 1,233,796.

The Canadian casualty total was
101,008, made up of 36,018 killed;
2,866 missing; 53,073 wounded and
6,051 prisoners of war. Those listed
as killed do not include personnel
who died from natural causes.

ROSEBUD GARAGE
Didsbury, Alberta

OPEN SEASONS ON GAME
ANNOUNCED BY DEPT.

The provincial lands depart-
ment, in charge of Alberta game
regulations, has announced the
open seasons for game birds and
big game hunting in Alberta.

Shooting of Hungarian partridge
and sharp-tail grouse this year will
be confined to Southern Alberta in
the district south of Calgary.

For Hungarian partridge the north-
ern boundary will be Highway 1
to Highway 24; along Highway 1
to Highway 9 and from there to the
Saskatchewan boundary. The season
will open October 1 and close
November 24th.

Sharp-tail grouse may be shot in
the area extending from the main
line of the Canadian Pacific Rail-
way, through Calgary, Bassano and
Medicine Hat, from October 8 to
October 27.

There will be an open season on
pheasants throughout Alberta from
October 8 to October 27, and a longer
season in the Eastern Irrigation
District.

The ducks and geese season will
be from Sept. 15 to December 15
in this part of the province.

ELK AREA EXTENDED

The area for shooting elk in the
Peninsula-Brazau and Saskatche-
wan river areas has been extended
south to the Red Deer River with a
bag limit of one male.

In the Pincher Creek elk area
the bag limit has been increased
from one to two animals, either
sex, and the season opens Novem-
ber 1 and closes April 30.

Open seasons for big game in
this part of the province will be
announced later.

The game bird license for Cana-
dians non-resident of Alberta has
been reduced from \$10 to \$5.

Members of His Majesty's forces
and forces of the United States sta-
tioned in Alberta now will be con-
sidered residents of the province
under the Game Act and entitled
to resident licenses for bird and big
game.

DOMINION ROYAL

ROSEBUD GARAGE
DIDSBURY, ALBERTACANADA TO SUPPLY NEW
MEAT PRODUCTS TO EUROPE

Canada is now helping to feed
Europe with canned meat products
of a kind never before manufac-
tured in the Dominion. The Meat
Board chairman, J.G. Taggart has
announced Canada's progress in
meeting its commitment to supply
UNRRA and liberated countries
with ten million pounds each of
canned blood sausage, meat spread
and meat paste—all processed from
nutritious meat cuts and by-pro-
ducts for which there is yet little
Canadian demand.

Rich in protein, these new can-
ned foodstuffs are a blend of meats
such as cheeks, tripe and kidneys with
oatmeal or flour and seasoning.
Blood is the largest single ingredi-
ent in the canned blood sausage,
but this new product and the meat
paste also contain pressure-cooked
bones of young animals. These
have a high content, not only of
fat and protein but also of calcu-
m and phosphorus, of which there
is a shortage in the present Euro-
pean diet.

BALANCE OF

Quebec City Becomes Two-Way Repatriation Centre

STRATHEDEN FIRST IN: Quebec City started
on July 30 to share with Halifax as a repatriation centre
for Canadian servicemen coming back from the German
War and British civilians and child war guests returning
to the Old Country. First troopship to dock at the
Windsor Cove pier which the Canadian Pacific built for
its famous Empress of Britain was the Stratheden (top)
with happy airmen and soldiers being despatched from
there to their homes all over Canada in C.P.R. special
trains (bottom left) on July 31. On August 1 the other
side of the picture was presented when the first boat train
for Quebec since the outbreak of war left the C.P.R.'s
Windsor Station in Montreal with passengers including
the British children (bottom right), among them the lad
on the extreme left taking home his Canadian hockey
sticks.

It's Cooling "ICE TEA"

OUR COMPLETE SHORT STORY—

Duke's Mistake

By CHRIS ROBERTS

McClure Newspaper Syndicate

While the act was on Min could scarcely breathe. Her throat would go dry and she would plead with Duke: "Don't turn your back on the cat! Keep him moving!"

Min would watch the fire in the big creature's eyes. She would try to turn him; stop that stalking, stalking. And she had always done it until one night at the end of the season.

Duke Cranston, trim and fit as they make them, blond hair, smooth cheeks that were flushed a bit beneath his steel blue eyes, seemed but a boy as he stood there in the dressing room before the show.

"Fifteen years today, Min," he said, "started with the cats. Been three years with the big Bengal."

"He's still a jungle devil," said Min.

"... and with plenty of brains," added Duke. "If he'd just come through honey. The big act would put us in the Winter Garden."

"And an apartment nearby."

"Have some friends dropping in?"

"... and ... maybe a baby," whispered Min.

"Lord, girlie!" exclaimed Duke. "I've just got to get him back on his haunches again ... I've got to!"

"Some day," Min encouraged, "some day he'll get it, and without the lash across his feet!"

"Sure, I know how you feel, sweetheart. The big fellow knows the crack of the whip, and he gets the command, but I've got to ..."

"No! You just can't turn that head across his legs and get away with it!"

"But, maybe, now ..."

"Just keep in mind," emphasized Min, "the night you looked through the rings of your smashed chair."

"Heck, yes! Duke shuddered, and stooped to wipe some dust from his patent leather boots.

Duke's whip had lifted the animal that night, but he had not stayed back. The twenty front legs had come up for a moment when the cat had sprung straight out and down. The act had failed. It was too dangerous to repeat.

Tonight, inside the iron barred arena, was the best show of all. You could hear Duke yelling at the king of the cats. He would scream at Duke just as if he were mocking him.

"You're getting nervous again," cautioned Min, "and you're making him jump, Duke! Look at him!"

The huge beast's eyes were so loud you couldn't hear Duke at all ... not even the pistol cracks of his whip. Now all eyes were on the round. There wasn't anything to see but Duke's stuff.

"Watch him every minute, Duke! Don't take your eyes off him!" Min had left the cage. She clung close to the heavy bars, flinging cautioning words to Duke.

"Don't worry, honey! He's soft as a puppy tonight," Duke laughed and sent the handsome stripes back up the steps; the whip snapping fire above the creature's glowering rump.

Min watched the swaying head of the Bengal; she caught the wicked glint in his eyes. He was working closer to the ground.

"For heaven's sake, Duke! Keep him back!" Nervously she ran her fingers through her black, waving hair. She couldn't trust the animal. Its docile purr and calm manner did not deceive her. She tried to keep her chin from quivering.

"Coming O.K., hon. The big boy is loving as a chorus girl tonight."

Duke brought him down from the high platform, marched him across the floor of the arena and told him over like a terrier. Then came the

smashing crack of the whip and the cat went bounding up the staircase. "Up! Up!" There was no particular hope in Duke's heart, but he followed with whip-snap signals in quick succession. The lash blazed along the tiger's sullen side. Duke kept right after him; crowding, pushing him.

Min watched the long corded muscles contract under the striped coat; she noticed that the sound of Duke's whip brought no reaction from the beast. She didn't like that.

"Careful, Duke! Careful!" Min's voice was strange, hollow.

"What the heck?" Duke gave Min a quick glance. His right hand moved backward; his arm lowered as he turned. The lash went through the air and swung outward, curved reptile-like in swirling coils. The tiger crouched and flashed out a protecting paw. The stinging whip snapped like a pistol shot; it was blistering hot across the Bengal's uplifted leg.

The black and yellow stripes leaped upward, on to the high platform at the top of the stairs; slowly, gracefully, he moved to the end ... and, as Duke's eyes remained glued to the great, handsome head, sat up like a dower's pet poodle.

With icy grasp, Min clung to the iron bars of the cage. Oh! Oh! She gasped. "Look ... look at those paws! See, Duke! He's posing ... posing there in the spotlight!"

The roar of the audience broke into waves that rolled across the ceiling of the massive tent. Duke turned. Gratefully he bowed low. The stripes of the big animal flashed through the air. The thunder from the crowd calmed into dying gasps. Min sank to the savannah strewn ground as the monster landed noiselessly just back of Duke.

Min didn't hear the screams; she didn't see the horror-struck faces high on the seats above them. Duke did, and he turned to meet the treacherous, sneering rush. The tiger reared and stretched full length upon his hind legs and, as women fainted in their seats and men turned away their averted faces, put his paw on Duke's broad shoulders and planted a cold nose against Duke's momentarily averted face ... in a gentle, affectionate kiss.

All-Purpose Frock

4842
24 45

Season your all-purpose frock with scallops, for that sought after feminine look. Pattern 4842 flatters all figure types. Just long, straight seams to stitch up.

Pattern 4842 comes in sizes 34, 36, 38, 40, 42, 44, 46. Size 36 takes 3 1/2 yards 39-inch material.

Send twenty cents (20c) in coins (stamp not accepted) for this pattern. Write plainly Size, Name, Address and Style Number and send orders to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175, McDermott Ave. E., Winnipeg, Man.

"Because of the slowness of the mail delivery of our patterns may take a few days longer than usual."

HELD IN FRANCE

Jack Cummings, Plymouth, Eng., sent £10 (\$45) in a registered letter to his son abroad H.M.S. Arcturion in the Mediterranean and later was informed it had been lost through enemy action. Now Cummings has received the same letter, with the £10, with the post office note: "Detained in France during German occupation."

On the Canadian scene: At Melfort, Sask., the menfolk of the Anglican church reversed things by pouring tea at the lawn social. ... Mrs. Annie Elliott has just renewed her subscription to the Tara (Ont.) Leader for the 64th consecutive year. ... Olson Brothers at Pollockville, Alta., tried to keep beavers on Berry creek away from their grove of trees, building a wire fence on the banks; the animals dug a neat hole under the fence, cut out some largest trees, and pulled them through the hole for their dams. ... Fred Bennett at Keewagama, northern Ontario, was landing an 18-in. pike, when another tried to swallow it, as a result he landed the two, the latter being a 24 pounder. ... Mrs. James Stewart, Holby Cross, N.S., tells of 10-months old hybrid pullet laying an egg 6 1/2" by 5", two minutes later laying two soft shell eggs of normal size, and that we call over-production.

The fishing industry is really something in the Maritimes, a New Brunswick weekly paper tells us, giving the following interesting information: Canada's list of fish species embraces nearly 60 different kinds, chief among which are salmon, herring, cod, lobster, whiting, halibut, sardines, haddock, pickard and pickerel. The total quantity of fish of all kinds taken by Canadian fishermen in 1914 was 12,352,898 cwt., for which fishermen received at the point of landing, a total of \$49,031,781, compared with a catch of 11,233,710 cwt., with a land value of \$17,734,725 in the preceding year.

The Red Cross gets contributions from a lot of sources in Canada and one of the oddest is from "wishing wells" in national parks. The public seem to take kindly to donating at these places. The "wishing well" in Banff National Park, Alberta, is a pool just below a waterfall. In it were dropped "wishing coins" to the total of \$639.14 during the past season. In Riding Mountain National Park, Manitoba, the "wishing well" netted a total of \$252.45, this amount being deposited in the pool by none less than 21,265 persons.

Not so many Canadians appreciate the importance of catering to tourist trade, but this editorial in the Midland Free Press indicates the editor knows what it's all about: "Tourist traffic is merely a subdivision of the goods and services which we make up the total volume of trade between nations. Many persons have the same difficulty in realizing this as they have in believing that experts of grain from the prairies affect the income of fishermen in Nova Scotia, or that the success of our commercial service in finding a market abroad for products of the factories in Quebec has its repercussion on the welfare of farmers on the Pacific coast. Not everybody comes into direct contact with the tourist traffic. Everyone knows that hotels, railroads, airlines, restaurants, and curio shops draw part of their revenue from the tourists, but actually the payments made by tourists for services and goods reach down through the whole economy."

The Saskatchewan Co-operative Creamery Ass'n. is the largest of its kind in Canada, and when it opened a plant at Shaunavon recently, it was the 31st branch in the organization. Last year the Coop. made 20,000,000 lbs. of butter.

The King's County Record at Sussex, N.B., makes it plain that the growing influence of home and school associations throughout the Dominion really means something. One of the greatest opportunities for women to day to yield an influence which can be felt far beyond their immediate community comes through their membership in some organization which has for its primary purpose the improvement of unfavorable existing conditions in educational, social or economic life. The opportunity may lie in the Home and School association which has for its objective the improving of the educational facilities in her community. By her sympathetic co-operation she has the satisfaction of seeing the situation studied and adjustments made. For only through sympathy and understanding do these changes come.

Indicative of the spirit of the early settlers of Maine are towns named Hope, Harmony, Friendship, Unity, Concord and Union.

Meaning Of Citizenship

Questions Worth Considering By The Young And Old

When Saul of Tarsus faced his accusers and said "I am a Roman citizen; I appeal to Caesar," there was no question as to what was meant by the words, "Civis Romanus sum". When the scribes wrote in the Great Charter at Runnymede, "To no free man will we sell or deny or delay justice," neither King John nor his barons had any doubts as to the nature and value of freedom.

When Sir John A. Macdonald declared, "A British subject I was born, but by right of citizenship I will die," he knew, both racially and in his own person, the faith and loyalty whereof he spoke.

But when we say, "I am a Canadian," what do we mean? More important still when we administer the Oath of Allegiance to a newcomer, extend to him our full political rights, and tell him that he is now a Canadian, what does he think that he is doing for him? Most important of all, perhaps, when our boys and girls stand up on the first of July, to salute our flag and sing O Canada, what is their idea of their rights and duties in this Dominion which stretches from sea to sea and from the river to the ends of the earth?

These are questions worth consideration by all Canadians, young or old, and whatever their "racial origin".

These are questions worth consideration by all Canadians, young or old, and whatever their "racial origin".

Electric Fences

Used Successfully To Control Live Stock In Pastures

Live stock as a rule need little training to keep away from electric fences. Observations at the Dominion Experimental Station at Swift Current, Sask., show that the animals learn very quickly and do not approach a fence even when it is not charged. At Swift Current, a 12-plate wet battery was used on an electric fence that was used through out the summer months last year for pasturing cattle. The cattle were well controlled, no harm was done to the cattle or the attendant, and the battery was still charged at the end of the season.

The use of electric fences is gradually becoming more widely adopted for pastures. These fences have many advantages but care is necessary in establishing the equipment. Among the advantages are reduction of cost in erecting temporary fences, reduction of expenditure for wire posts, and gates, reduction of injury to live stock; the adaptation in the west to winding coulers or temporary pastures areas; otherwise impractical to fence, and the enclosure in the fields of untillable lands that otherwise might be wasted. As a rule, one or two wires are sufficient to carry the electric current. One wire is sufficient for horses and cattle. Two wires are considered preferable for pigs and sheep. The wire can be supported by porcelain insulators on 2" by 2" stakes set in the ground 30 to 40 feet apart.

As a rule, one or two wires are sufficient to carry the electric current. One wire is sufficient for horses and cattle. Two wires are considered preferable for pigs and sheep. The wire can be supported by porcelain insulators on 2" by 2" stakes set in the ground 30 to 40 feet apart.

The use of electric fences is gradually becoming more widely adopted for pastures. These fences have many advantages but care is necessary in establishing the equipment. Among the advantages are reduction of cost in erecting temporary fences, reduction of expenditure for wire posts, and gates, reduction of injury to live stock; the adaptation in the west to winding coulers or temporary pastures areas; otherwise impractical to fence, and the enclosure in the fields of untillable lands that otherwise might be wasted. As a rule, one or two wires are sufficient to carry the electric current. One wire is sufficient for horses and cattle. Two wires are considered preferable for pigs and sheep. No Services at United Church

The Knox United Church will be closed for the next two Sundays. Regular services will be resumed at Westcott and Didsbury on Sunday, September 9th.

Rev. D. Whyte Smith, minister

Six C.G.I.T. girls left Wednesday morning to attend camp at Kaslo Beach, Sylvan Lake, for the next ten days. They were Ebb Davis, Mona Stevens, Laura McCoy, Pauline Bowman, Jean Rennie, and Winona Rouleau.

Mr. and Mrs. Jones of Calgary are visiting in town this week with Mr. and Mrs. W. Wilson.

Mrs. Roy McArthur and children motored to Calgary Wednesday.

Miss Marion Brillingier of Toronto, Sunday School lesson writer of the United Church, spent three weeks assisting at Sylvan Lake leadership and young people's camp. She is visiting for a few days this week with Mr. and Mrs. J. V. Berscht.

Mr. and Mrs. A.H. Foote and Lt. Delmar Foote returned Saturday from their holidays in the Okanagan and at the Pacific coast.

CARD OF THANKS

We wish to thank our many kind friends and neighbors for the sympathy extended and the kindness shown at the time of our recent bereavement.

THE GOURDINE FAMILY

IN MEMORIAM

In Loving Memory of Pilot Officer Frank Kohut, Aug. 26, 1944. We have only your memory, dear boy.

To remember our whole life through; But the sweetness will linger for ever. As we treasure the image of you.

Fondly remembered by:
Dad, Mother, Brothers and Sisters

TENDERS WANTED

Sealed tenders for the erection of a frame addition, size 24 x 30 to the Carstairs Primary school building, will be received up to 5 o'clock p.m. Saturday, September first, 1945. Plans may be seen at the office of the Secretary-Treasurer. The lowest or any tender not necessarily accepted.

Carstairs School District No. 642
L. ALDRICH,
Sec.-Treas.

LOCAL NEWS

—For painting and repair work apply to C. Rapien, East Didsbury, 41
